

MARCFI's

General Technical Features

- *Boiler (electric) and Hydraulic Circuit in copper 99.9Cu*
- *Groups in hot forged brass OT58*
- *Boiler Security Valve and Anti-Vacuum Valve*
- *Regulating Injectors to adjust coffee temperature in each group, without modifying the boiler temperature*
- *Automatic filling boiler (except in the lever machines)*
- *Electronically controlled Dosing Centrals totally independent for each Group*
- *Independent Electronic Supply for the continuous function*
- *Built-in Computer with display viewing the functions and breakdowns (on M990CD model)*
- *Electronic Temperature Sensor (on M990CD model)*
- *2 Multidirectional stainless steel steam spouts with heating protector (except for the 1 group machine)*
- *1 extensible Hot Water Spout with large size diffuser to avoid splashing*
- *Rotating Motorpump and Motorpump Pressure Manometer*
- *Boiler Pressure Manometer*
- *Motorpump with magnetic filter*
- *Pre-infusion (in automatic models)*
- *Regulable Thermostat*
- *Breakdown detector*
- *Water spout for manual emptying the boiler*
- *Manual spout to interrupt the automatic filling boiler*
- *3-positions main switch (stop, maintenance, full power)*
- *Warning Lamp connection led*
- *Stainless Steel Body*
- *Painting with Epoxy Antioxidant*
- *Best European Manufacturers Electronic Components*
- *Ratio boiler capacity / Power elements: one of the highest in the market*
- *Heating of the cups of coffee thanks to the boiler heating*
- *Possibility to connect the Electronic central to a computer*
- *Available in 3 colours.*

Options

- *Cappuccino kit*
- *Capucinator kit*
- *Gas kit*
- *Security thermostat for power element*
- *Special filterholder for high cups (up to 12oz)*
- *Special filterholder providing up to 1 litre of coffee.*
